

## Meet Nexis® Data Lab— accelerated access to unmatched data

### Uncover an easier way to perform data discovery

Nexis® Data Lab is a next-generation text and data mining solution that accelerates the discovery process so you can identify insights and quickly produce results. With access to the LexisNexis® collection of data and using the Jupyter Notebook environment, now you can go from hunch to hypothesis to validation faster.

#### **Accelerate contributions to your university and area of expertise**

Analyze thousands of documents in a matter of minutes, all within the Jupyter Notebook environment. And because LexisNexis® full text data never leaves the notebook workspace, you get both enhanced speed and comprehensive data in one place.

#### **Keep your results and keep analyzing**

Leveraging the best-in-class Jupyter Notebook environment, Nexis® Data Lab lets you export your analysis, notebook code and document manifest to your computer to use later, or to reproduce your findings at your convenience.

#### **Do your research your way**

With the option to analyze using text or visualization, Nexis® Data Lab gives professors more bandwidth to vet and publish work, and students more autonomy over their own research. And because LexisNexis® handles the hosting, maintenance and engineering, your focus can be where it should be: on your next breakthrough.

Possibilities are unlimited when you can quickly search, examine trends and analyze data all in one spot. **Talk to your sales representative about how you can take your research from discovery to done with Nexis® Data Lab.**

**Contact your LexisNexis® consultant to learn more.**
