

A bulk patent delivery platform, LexisNexis® IP Data Direct—Patents (IPDD) offers access to one of the most comprehensive full-text patent data sets from 105 authorities.

After aggregating global patent content from multiple sources, LexisNexis enhances and standardises the data, providing it in one single format. As a result, IPDD removes the complexity of gathering different data sets and formats from various sources. Every single publication is delivered in standardised XMLs, based on the WIPO ST.36 standard.

Delivery options include both patent applications and grants with images, available from major authorities and includes value added elements such as:

- Scopus ID/URL
- Normalised / Standardised name
- Family – Main, Complete Family
- Legal Data
- Post Issuance
- Daily Assignments
- National Notification
- Claim References
- English Equivalent
- Non-Latin Lookup Assignee
- PDF Information
- Clipped Image Information
- All Images Information

Patent data is delivered in the original language as well as machine translation in English.

## IP DataDirect Features at a Glance

IP DataDirect	IP DataDirect Search API	IP DataDirect Custom Services
<p><b>Online delivery platform to supply complete or partial patent information</b></p>	<p><b>Direct search in the full collection and immediate implementation into your inhouse data system</b></p>	<p><b>Customisable on-demand delivery of patent data sets, tailored to your data needs</b></p>
<ul style="list-style-type: none"> <li>• required authorities only</li> </ul>	<ul style="list-style-type: none"> <li>• customised search string set-up</li> <li>• unlimited number of documents</li> </ul>	<ul style="list-style-type: none"> <li>• consultation on data selection and support on building the search strategy</li> </ul>
<ul style="list-style-type: none"> <li>• updates within hours of publication</li> </ul>	<ul style="list-style-type: none"> <li>• integration into your own solution</li> </ul>	<ul style="list-style-type: none"> <li>• delivery within days</li> </ul>
<ul style="list-style-type: none"> <li>• one standardised format for all patent data</li> </ul>	<ul style="list-style-type: none"> <li>• management system, analytic tool or in-house search solution</li> </ul>	<ul style="list-style-type: none"> <li>• availability of all data fields</li> </ul>
<ul style="list-style-type: none"> <li>• updates through API or FTP</li> </ul>	<ul style="list-style-type: none"> <li>• choice of output format (XML, Excel, CSV, custom)</li> </ul>	<ul style="list-style-type: none"> <li>• availability of all date ranges</li> </ul>
<ul style="list-style-type: none"> <li>• segmentation based on technology area, date ranges, data elements, kind code, etc</li> </ul>	<ul style="list-style-type: none"> <li>• choice of relevant data elements</li> </ul>
