

Enhanced Data, Delivered

Get the exact data you need—precisely how you need it—with Nexis® Data as a Service (DaaS)

Accelerate your time to insight with intuitive, flexible APIs and platform options that connect you to an unrivalled data universe spanning current and archival news, social commentary, company and executive information, regulatory, legal and patents data.

How does enhanced data from Nexis Data as a Service empower performance?

Get the data you want, with multi-tiered enrichment options to suit most data needs and budgets. Organizations around the world depend on our data to support:

Descriptive & Predictive Analytics

Conduct historical analysis and build predictive models using news and company data to draw correlations between events and performance.

Data Modelling

Identify patterns, build correlation models, and support predictive insights to inform a wide range of business decisions.

Media Monitoring

Leverage data feeds to monitor news cycles, track brands, analyze sentiment and optimize PR, marketing, and sales efforts.

Product Innovation

Enable data integrations to drive product development, power proprietary applications, or augment CRM data.

Machine Learning

Develop, train and test algorithms for supervised or unsupervised data processing, sorting, and pattern recognition, such as Natural Language Processing.

Risk Management

Ingest critical PEPs, sanctions, and watchlists or adverse media data into a variety of applications to improve visibility into potential reputational, regulatory, financial, and strategic risks.

Corporate Research

Access relevant, high-volume data to support competitive research, capture market and industry intelligence, or conduct trend analysis to inform business development.

What APIs and data environments are available with Nexis Data as a Service?

Search & Retrieve APIs. Search and Retrieve APIs offer access to a wide variety of datasets with search and retrieve functionality, as well as post-search filters to further refine results. These can be set up to automatically retrieve data on a regular cadence.

Content	Licensed News	Web Content	News Archive	Critical Mention Broadcast Data	PEPs, Sanctions & Watchlists	State Owned Enterprises	Legal	Company Information	Patents Data
Nexis® Metabase Search (News Archive: up to 10 years of Premium News or the past 100 days of Web News)	✓	✓	✓						
Nexis® Metabase Filters (Critical Mention Broadcast Data: 2+ year archive)	✓	✓	✓	✓					
Webservices API (WSAPI) (News Archive: full 40+ year archive; Legal: includes dockets)	✓	✓	✓		✓	✓	✓	✓	
CDDS Risk API (Only CDDS lists included.)					✓				
LexisNexis® IP DataDirect									✓
LexisNexis® PatentSight®									✓

Take a Closer Look at the Search & Retrieve APIs

Nexis Metabase Search

Use search queries supported by Boolean syntax and search operators to search—no hosting required.

- Up to 200 articles returned per search, with the ability to make subsequent calls every 10 seconds.
- Articles typically available about 2 minutes after entering our system.

Web Services API (WSAPI)

Access enhanced functions such as search, retrieve and saved searches. Implement within your own user interface, simplifying developers' interactions with the services.

- Retrieve data on demand with no hosting
- Enhanced post filtering and LexisNexis® SmartIndexing taxonomy to reduce noise
- XML formatted data for ease of use

CDDS Risk API

Integrate critical sanctions and black lists data deployed by CDDS into risk management workflows.

- Verify if a person or a company is listed on sanctions, blacklists and other lists provided by CDDS.
- Enable faster supplier onboarding and ongoing risk monitoring.

Nexis Metabase Filters

Take advantage of categorization and tagging based on more than 100 data elements, including Sentiment, Industry, Company, Subject, and more.

- Use filters as needed to bring back targeted data.
- Create custom calls using pre-set search queries to return matching content on an ongoing basis.

LexisNexis IP DataDirect

Search the full collection of global patent data from 100+ authorities, standardized in a single format.

- Create a custom search string for focused result sets.
- Integrate with your own download client or AI application.

LexisNexis PatentSight API

Uncover more robust insights from enriched patents data that includes our proprietary qualitative patent scoring metrics and features:

- Point-in-time patent data and company ownership information
- Weekly database updates
- Patent portfolios of companies in major stock indices

Bulk Delivery

Bulk delivery options deliver semi-structured news, legal and regulatory content reaching back more than 30 years. These deliver large volumes of content for historical analysis, predictive modeling and more.

Content	Licensed News	Web Content	News Archive	Critical Mention Broadcast Data	PEPs, Sanctions & Watchlists	State Owned Enterprises	Legal	Company Information	Patent Data
Nexis Metabase Firehose (State Owned Enterprises, PEPs, Sanctions & Watchlists: Info4C only; Legal: US only; Critical Mention Broadcast Data: 2+ year archive)	✓	✓	✓	✓	✓	✓	✓		
Metabase Archive	✓	✓	✓						
Bulk API (State Owned Enterprises, PEPs, Sanctions & Watchlists: Info4C: CSV format only; Legal: US only)	✓		✓		✓	✓	✓	✓*	✓
LexisNexis IP DataDirect – Bulk									✓
LexisNexis PatentSight (FTP for bulk or custom data pull)									✓
OpenCorporates Bulk API							✓		

* Limited to bulk download of CorporateAffiliations data.

Take a Closer Look at the Bulk Delivery Options

Nexis Metabase Firehose

Ingest content, with up to 500 articles returned with each call.

- Schedule calls 20 to 60 seconds apart, depending on the volume of content you are set to receive.
- Articles are typically available about 2 minutes after initially coming into our system.

Metabase Archive

Extract up to a 10-year archive of Premium News or 100 days of the Web Harvested content, from AWS or an FTP site based on the number of years required for on premises hosting.

Bulk API

Integrate a large volume of hostable content from thousands of sources into your own system with this standard mechanism for bulk data delivery.

LexisNexis IP DataDirect – Bulk

Ingest 30+ years of global patent data from 100+ authorities.

LexisNexis PatentSight

Analyze patents data over time to understand the innovation path of a company or portfolio and how it contributes to a competitive advantage.

OpenCorporates Bulk API

Ingest legal entity data to bring clarity to ambiguous corporate structures and enhance risk analytics.

- Standardized data covering 165+M companies and 220+M officerships across 130+M jurisdictions.

Nexis® Data Lab for Academic

Take advantage of our enhanced data from within a convenient, cloud-based data lake solution.

Content	Licensed News	Web Content	News Archive	Critical Mention Broadcast Data	PEPs, Sanctions & Watchlists	State Owned Enterprises	Legal	Company Information	Patent Data
Nexis Data Lab for Academic	✓	✓	✓						

Take a Closer Look at Nexis Data Lab for Academic

Nexis Data Lab for Academic

Leverage the best-in-class Jupyter Notebook environment, allowing users to confidently code, analyze, and reproduce findings—no hosting required.

- Analyze up to 10,000 documents without having to download data to a laptop.
- Flexible enough for varying experience levels—select from pre-packaged and open-sourced notebook libraries or embed custom code.

Need additional technology support?

Nexis Solutions offers an established support ecosystem:

- Our Integration Solution Specialists are available to help customers get APIs up and running quickly, as well as post implementation support, to enhance digital transformation initiatives.
- We collaborate with trusted third-party technology providers to accelerate AI implementations such as robotic process automation and adverse media screening.

Derive more insights from data

We've been connecting customers around the globe to critical data since 1973. See what's possible today!
